ABOUT

MERN-based Developer with comprehensive hands-on experience at all levels of testing. Well-versed in various programming languages including C++, JavaScript, and TypeScript. Live Client experience in the field of software engineering. ALWAYS READY TO LEARN AS WELL AS FOR A CUP OF COFFEE.

WORK EXPERIENCE

Softweb Solutions, Ahmedabad TECHNICAL ANALYST

Sept 2022-till Date

Working as a ReactJS and NodeJS Developer on the product IOT Connect, where they demonstrate IOT device connectivity and various functionalities to perform on them (devices like edge , gateway, sphere and more) My role is to handle bug fixes and update the UI as needed for the story. And manage the entire AWS and Azure Instance deployment process.

QMetry, Ahmedabad ASSOCIATE UI DEVELOPER

June 2021 - Sept 2022

QMetry is a product-based firm that sells numerous test management products (QTM , QTM4J, and QAS). As a react developer, I was given the opportunity to join the QTM4J UI team. QTM4J is an Atlassian Jira integration for test management and exploratory testing. My responsibilities as a UI developer include improving the code base, troubleshooting the product for any tickets that are produced, adding new features to the product, and working on a chrome extension for exploratory testing. And, most recently, I received a pat on the back for successfully completing a sprint without a problem. Also utilized Redux, Jquery, ES6+, Backbonejs, ChartJs, SASS, Virtualization, JIRA, Service Worker, Atlaskit, and other technologies.

MagentaBI, Ahmedabad DEVELOPER INTERN

Jan 2021 - June 2021

MagentaBI is a business intelligence startup that focuses on SMEs. It also provides visual data analysis from tabular data (excel, tally, databases, and more). At Magenta, I had the pleasure of working as a react js developer, where I created a variety of UI pages and updated the code base of many components. To improve the development of each UI component, we utilized Redux, D3, ES6+, API Integration, SQL, GitLab and Docker.

DAIICT, Gandhinagar WEB DEVELOPMENT INTERN

May 2020-Aug 2020

Developed a single-page Web-App using Vue-Cli and nodeJS. The whole web app was based on API which makes the data more streamlined and reliable. Learned a new technology VueJs. API development using Json.

EDUCATION

DAIICT, Gandhinagar MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

2019-2021 6.67CGPA

PROJECTS

The KabdaiWala [HTML, CSS, VueJs, JS, Rest API, ExpressJS, NodeJs, MongoDB]

Quantitive algorithm trading: It includes all of the required trading instruments and data for stock trading. Currency converter, trading news, live trading info, and related features.

Rating & Review: It rates and reviews a wide range of entertainment material (like Movies, Games, Tv series, Songs, and more). It is like IMDB and Metrics assign a ranking based on user input.

Urban clap: We built a directory to provide customers with expert resources under one roof. We used about ten entities, as well as DDL and DML.

BIT MESRA, Ranchi BACHELOR OF COMPUTER APPLICATION

2016-2019 7.01CGPA

PROJECTS

Jharkhand Tourism [HTML, CSS, Bootstrap, JavaScript, chartJS]

Real-Time Weather [HTML, CSS, JS, Rest API]
